PROFESSIONAL SUMMARY

Unity Game Developer with 4+ years of experience building and shipping mobile games across Android, iOS, and WebGL. Currently leading game development and platform integration for a live multiplayer gaming app, with hands-on ownership of gameplay, stability, and release quality. Delivered 25+ games, including 3+ published on the Google Play Store, and built a complete game solo in one week using AI-assisted development. Skilled in Unity 2D/3D, C#, multiplayer networking (Photon PUN, Socket.io), and Firebase/ad-monetization SDK integration, with hands-on experience in ads integration and resolving ad policy violations. Experienced in mentoring junior developers and consistently delivering projects on schedule.

TECHNICAL SKILLS

Languages: C#

Engines: Unity (2D/3D), Construct 3

Unity Core: UI/UX, Animation, Physics, Optimization, Addressables, ScriptableObjects, Editor Scripting, Custom Package Creation & Maintenance, Playable Ads, AI Integration (MCP)

Multiplayer & Networking: Photon PUN, Socket.io, REST API Integration

SDKs & Backend Services: Firebase (Analytics, Crashlytics, Remote Config, Firestore), Unity IAP, Unity Ads, AdMob, Google Play Services

Platforms: Android, iOS, WebGL

Tools: Git, GitHub, GitLab, Git Submodules, Visual Studio, Blender, Photopea, AI-assisted development (ChatGPT, Claude, Gemini)

WORK EXPERIENCE

SDE-2, Unity Developer | Sharpenminds Technologies Pvt. Ltd.

Aug 2025 – Present

- Develop and maintain Citta Lite, a live multiplayer gaming platform featuring 20+ games across genres including Tic-Tac-Toe, Ludo, Snake & Ladders, Carrom, Pool, Football, Breezy Blocks, Block Party, and Blackjack.
- Designed, built, and integrated 10+ new games into the platform, ensuring polished gameplay and stable, on-schedule releases.
- Implement and maintain multiplayer functionality using Socket.io and REST API integrations.
- Lead and mentor a team of 4 developers, providing technical guidance and hands-on support for debugging and issue resolution.
- Monitor and resolve ANRs, crashes, and performance issues to improve overall platform stability.
- Worked across multiple games beyond Citta Lite to improve ad placements and resolve ad policy violations, boosting monetization while maintaining compliance.
- Built and published a complete game (Perfect Landing) solo within a 1-week internal hackathon using AI-assisted development, including full Firebase SDK and ad-monetization integration.
- Maintain a 95%+ on-time project delivery rate while continuously shipping new game updates and features.

Game Developer | Gamecrio Studios Pvt. Ltd.

Jan 2023 – Jul 2025

- Developed and shipped 15+ games across multiple platforms, including 3 titles published on the Google Play Store.
- Built AEVIN, a multiplayer puzzle game, from scratch using Unity, C#, and Photon PUN, including custom transition animations.
- Developed Dino Chase, an endless-runner mobile game featuring collectible and customization systems.
- Developed Find Out Capybara Game, a hidden-object mobile game with offline mode and level-based progression.

- Collaborated with multidisciplinary teams (design, art, QA) to deliver polished, market-ready gameplay experiences.

KEY PROJECTS

- Perfect Landing (Google Play) — Solo-built in a 1-week internal hackathon using AI-assisted development; full Firebase and ad SDK integration. play.google.com/store/apps/details?id=com.futureoath.perfectlanding
- Citta Lite (Google Play) — Multiplayer gaming platform with 20+ games; built real-time multiplayer using Socket.io.
- AEVIN — Multiplayer puzzle game built from scratch using Unity, C#, and Photon PUN.
- Dino Chase & Find Out Cappybara Game — Single-player mobile titles with custom gameplay mechanics and progression systems.
- TapShot — Improved ad placement strategy, introduced a new game mode with checkpoint and reward systems, and added new obstacles to make gameplay more engaging.
- Contributed to ad placement optimization and ad-violation fixes across several other games on the platform, beyond Citta Lite.

KEY ACHIEVEMENTS

- Solo-built and published a complete game with full SDK integration in one week using AI-assisted workflows during an internal hackathon.
- Reduced development and iteration time significantly through effective use of AI-assisted tools across the team.
- Actively mentor a team of 4 developers, supporting their growth and technical problem-solving.
- Maintain a 95%+ on-time delivery rate across releases and continuously working toward 100%.
- Contributed to measurable improvement in Citta Lite's overall app rating through continuous feature releases.
- Shipped 25+ games total across both companies, with 3+ published on the Google Play Store.

EDUCATION

B.E. in Computer Engineering — Government Engineering College, Modasa

2019 – 2023 | CGPA: 8.5
